What is Tax File and how to create?

A TaxFile is a specific income year's TaxReturn file. For example, for income year 21-22, we need to create income year 21-22 TaxFile. TaxFile for next year will be income year 22-23 TaxFile. This should be created under a TaxPayer. If TaxPayer is not created we need to create TaxPayer first then we need to create TaxFile.
